FOREWORD

The Central Institute of Indian Languages was set up on the 17th July, 1969 with a view to assisting and co-ordinating the development of Indian Languages. The Institute was charged with the responsibility of serving as a nucleus to bring together all the research and literary out-put from the various linguistic streams to a common head and narrowing the gap between basic research and developmental research in the fields of languages and linguistics in India.

The Institutue and its four regional centres are thus engaged in research and teaching which lead to the publication of a wide-ranging variety of materials. Materials designed for teaching/learning at different levels and suited to specific needs is one of the major areas of interest in its series of publications. Basic research relating to the acquisition of language and study of language in its manifold psychosocial relations constitute another broad range of its interest. These materials will include materials produced by the members of the staff of the Central Institute of Indian Languages and its Regional Language Centres and associated scholars from Universities and Institutions both Indian and foreign.

The Central Institute of Indian Languages has initiated the **Pictorial Glossary Series in Indian Languages** which add visual cues to printed words. Designed for a wide ranging audience, it aims at improving both reading and comprehension. This glossary includes in itself both teaching and testing frames.

The Institute has already prepared Recall Vocabulary and Common Vocabulary series. We hope that addition of this Pictorial Glossary Series will go a long way in making teaching and learning more enjoyable.

D.P. PATTANAYAK
DIRECTOR
Central Institute of Indian Languages

INTRODUCTION

An important method adopted for teaching/learning the vocabulary of a language is the e of visuals. The books in this series **PICTORIAL GLOSSARY IN INDIAN LANGUAGES** exploit this method and make use of picture cues in the teaching/learning of vocabulary in Indian languages. These books are meant as supplementary aids in the learning of Indian languages primarily as second language by the adult and child learners. These can also be made use of by the mother tongue learners in lower primary classes and also by the adult neoliterates in learning the vocabulary.

The words included in these glossary books are chosen on the basis of their picturability. These words consist of basic vocabulary items of the respective languages. These also include other frequent words which are used in day to day contexts in different walks of life. Since these words were all selected mainly on the basis of their picturability, it is only natural that some important basic vocabulary items may not find a place in these books. The words were collected from different semantic domains such as those pertaining to man and society, flora and fauna, physical world, numerals, colours, action, assertion, etc. Words thus chosen were classified into following groups.

1. Words elicited as answers to the question **What is this ?** These are singular nouns and they fall in the subcategory of inanimate and non-human animate nouns. The major share of the glossary goes to this section.

2. Words elicited as answers to the question **What are these ?** These are some of the plural nouns of the first category and, like the above group of words, fall in the subcategory of inanimate and non-human animate nouns.

3. Words elicited as answers to the question **Who is he/she ?** These include nouns which identify individuals (people) by their professions and/or by their other characteristic features such as age, sex, physical deformities, etc.

4. Words elicited as answers to the question **Who are they ?** These include some of the plural nouns of the above category.

5. Words elicited as answers to the question **What is this number ?** which present numerals.

6. Words elicited as answers to the question **What colou is this ?** giving colour terms.

7. Words elicited as answers to the question **What sort of a cat/pencil/ball/line/box/umbrella is**

this ? giving adjectives, or words functioning like adjectives.

8. Words elicited as answers to the question **What is/are he/she/it/they doing ?** giving verbs of action.

9. Words elicited as answers to the question **What is happening ?** giving verbs of action which are impersonal.

10. Words elicited as answers to the question **Where is the mango ?** giving postpositions and particles showing location.

Note that while presenting the words, the relevant question is written on the top left in every page of the book.

In these books the words are not presented in an alphabetical order but on the basis of their sematic or other types of relationships which make the registration and recollection of words easier for the learners. For example, the words in the first category containing nouns are presented in an associational order as given below :

(i) Words related to man such as body parts ;

(ii) Words related to man such as dresses and ornaments ;

(iii) Words related to man's immediate environment such as house, parts of house, and household articles ;

(iv) Words related to man's food items including fruits and vegetables ;

(v) Words related to man's education ;

(vi) Words related to man's professions ;

(vii) Words related to man's different institutions concerning religion, politics, government, entertainment, sports, games, trade, transport, etc ;

(viii) Words relating to common animals, birds, creatures, etc.;

(ix) Words relating to trees, plants, and their parts; and

(x) Words relating to the physical world such as earth, sky, etc.;

Similarly the verbs are also presented in an associational order such as the verbs of action relating to body parts, cooking, sports and games, entertainment, education, profession, animals, etc. This type of ordering in presentation enables the learner to associate one word with the other easily and to acquire

it without difficulty. In every group and within every subgroup such an order of association is followed while presenting the words.

There are in all in each **Glossary** book 1284 frames. Each visual is considered a frame. Of these 1284 frames, only 1068 frames are for learning items. That is, 1068 words are introduced for learning purpose. The remaining 216 frames are for testing purpose. These 216 frames present visuals, words for which have already been introduced. The words for testing the proficiency attained have been culled out from various semantic domains and are presented under each semantic group, or related groups of words. For example, as soon as the introduction of 60 vocabulary items presenting the body parts are over, 12 visuals from the same group are repeated without verbal cues. The learners are expected to provide the word for the visual given in each of these testing frames on their own without consulting the preceding visuals presented for learning those items. An Answer Key is provided as Appendix I. Appendix II of the book has an index listing all the vocabulary items introduced in the **Glossary**, alphabetically arranged in the respective language. Each entry in the index gives on the right hand side the serial number of the visual for that word.

In the **Glossary** itself each visual is presented with a serial number at the left hand corner in the bottom. These serial numbers are given left to right and the learners are advised to follow the same order while learning the glossary. Serial number of the visual is followed by the word appropriate for it. In some cases the visuals may be perceived as rather too general to suggest a single word exclusively for the visual. In these cases an arrow mark is used to pin point the item meant for the frame. For example, in frame number 4 the part of the visual for which the word stands is cheek and this is indicated by an arrow mark. So when such a visual is used in the test the learners are also expected to give only the word meant for it as given in the learning frame.

In each testing frame the visual is provided with the serial number which is followed by a blank space. The learners are required to supply the appropriate word. They are expected to write the word with correct spelling. They can, after writing, check with the key provided in Appendix I.

In a teaching situation where this book is used the teacher may use the visuals in the **Glossary** to teach also related words for parts of objects and their uses. Whether the students have learnt these additional words taught using the visuals in the **Glossary**

or not could also be tested by the teacher using arrow mark as a device in the concerned visuals.

Although the vocabulary items are presented as individual items in these glossary books, the questions eliciting responses of vocabulary items are framed taking into account the use of these vocabulary items in actual sentence frames. Accordingly each of these items can be elicited as individual words and also as words occurring in phrases and sentences. In other words, for the question **What is this ?** the response may be a single word such as **cat**, or it may be in the form of a sentence such as **This is a cat**. For the question **What are these ?** the response may be **cats** or **These are cats**. Hence it is suggested that the learners are taught these items first as individual entities (**cat** in response to the question **What is this ?**) and then their use in sentences (**This is a cat** in response to the question **What is this ?**). Generally speaking a vocabulary item is learned by a child not only as a word in itself but also as a component of larger units such as phrases and sentences. With the help of the visuals presented here the children can be taught vocabulary items mainly as individual words first, Their use in larger units of phrases and sentences will have to be drilled by the teacher manipulating different sentences and situations. This can be done as an extension activity of these glossary books. This extension may be better done based on the mastery of other words in the **Glossary**. For example, an adjective such as **big** may be used with the word **cat** to from a phrase **big cat**. Likewise a verb, for example, **run**, can be clubbed with the word **cat** to derive a sentence **The cat runs**. Also note that the responses can be elicited orally first and then in the written forms.

As already pointed out, words of action (verbs) are introduced as response to the question **What is/are he/she/it/they doing ?** Since the question is worded in third person singular or plural the response that contains the verb, given under each visual, is also in third person singular or plural appropriately changing the gender to suit the visual presented, as per the convention followed in individual languages. If the response thus given in the visual is for instance, in masculine gender, the teacher can present the same verb with **she** or **it** or **they** as the subject, suitably changing the suffixes added to the verb. This helps the teacher exploit the same visual for drilling the conjugations of the particular verb for subject under various persons (first, second and third person). The same strategy can be adopted for the visuals given in testing frames as well.

Similarly the group 10 visuals which give words for postpositions indicating location can also be exploited. The first step in learning here is the mastery of the word for the particular position. Twelve such words are introduced for learning purpose. The second learning point is the use of the individual postposition in sentences appropriate to the sense intended in the visual. Here again, the frames have the potential for additional exercises by substituting the object and the location. For example, instead of the word for **mango** one could use words for other objects. Likewise instead of the word for **box**, **table**, etc., words for other objects could be used suitably. For advanced students the same visuals can be used to teach the stylistic variations in the use of postpositions. It is, thus, left for the ingenuity of the teacher, to exploit all such possibilities, depending upon the level of learning of the learner, and make use of the frames in the **Glossary** for various kinds of drills for effective teaching/learning and testing of the vocabulary items and their use in sentences.

For the preparation of these **Glossary** in different languages the individual authors were asked to collect words in their respective languages on the basis of the guidelines given regarding semantic grouping etc. The words thus collected were compared by the authors of **Pictorial Glossary** in other Indian Languages to arrive at a common list. This decision led to some difficulty also as we had to delete some words either because they did not exist in one of these languages or existed in a different grammatical category.

It may also be noted that no attempt has been made to depict the different meaning shades of a given word. Only the most important aspect of the meaning is presented with the visual form. However, one will find that there are some repetitions of the same word under different visuals in some Glossary books in these series. Whenever this occurs it will be seen that in that particular language the same word is used to refer to more than one concept, and that it is not the case in other languages, where they may have different words.

As far as possible compound words have been avoided for inclusion in the **Glossary**. Only in rare instances when the vocabulary item is very basic in some intutively felt sense and is a common item in most of the languages, a compound word is included in a particular **Glossary**. It is also possible that for a particular concept in one language there is a compound word and in others it may be expressed by a simple word.

Note also that in order for certain verbs to be understood correctly, the verbs have to be necessarily presented along with one or the other noun preceding them constituting a compound form.

Inherent limitations of picture as a communication mode and difficulties of transfer from language medium to picture medium and vice versa act as a constraint for the preparation of such instructional materials as these books. Fortunately, for us there are well laid conventions handed down to us in the panels of sculpture and painting in Indian art throughout the ages. Also conventions are available to us in various textbooks and magazines. Apart from these consciously developed conventions, we also come across in our day to day life certain practices that aim at picturising the verbal item and verbalising the picture. I have tried to exploit these conventions to a very large extent in guiding the artists for the presentation of the vocabulary items in the visual form. I hope that the adult second language learners would be able to use these books without help from others. In the case of children, both first and second language learneres, however, the teachers may have to guide them as regards the focus of visuals in some cases and for additional exercises.
